

Special Projects are gathering under our new brand **CAGSAN TECHNIC** !

CAGSAN TECHNIC, offers high quality and secure access solutions with special design products for your Special Projects, Aviation Sector, Rail System and Industrial Facility needs.

SERVICES

Visit on-site

On-site service is provided by our project planning team in line with your requests.

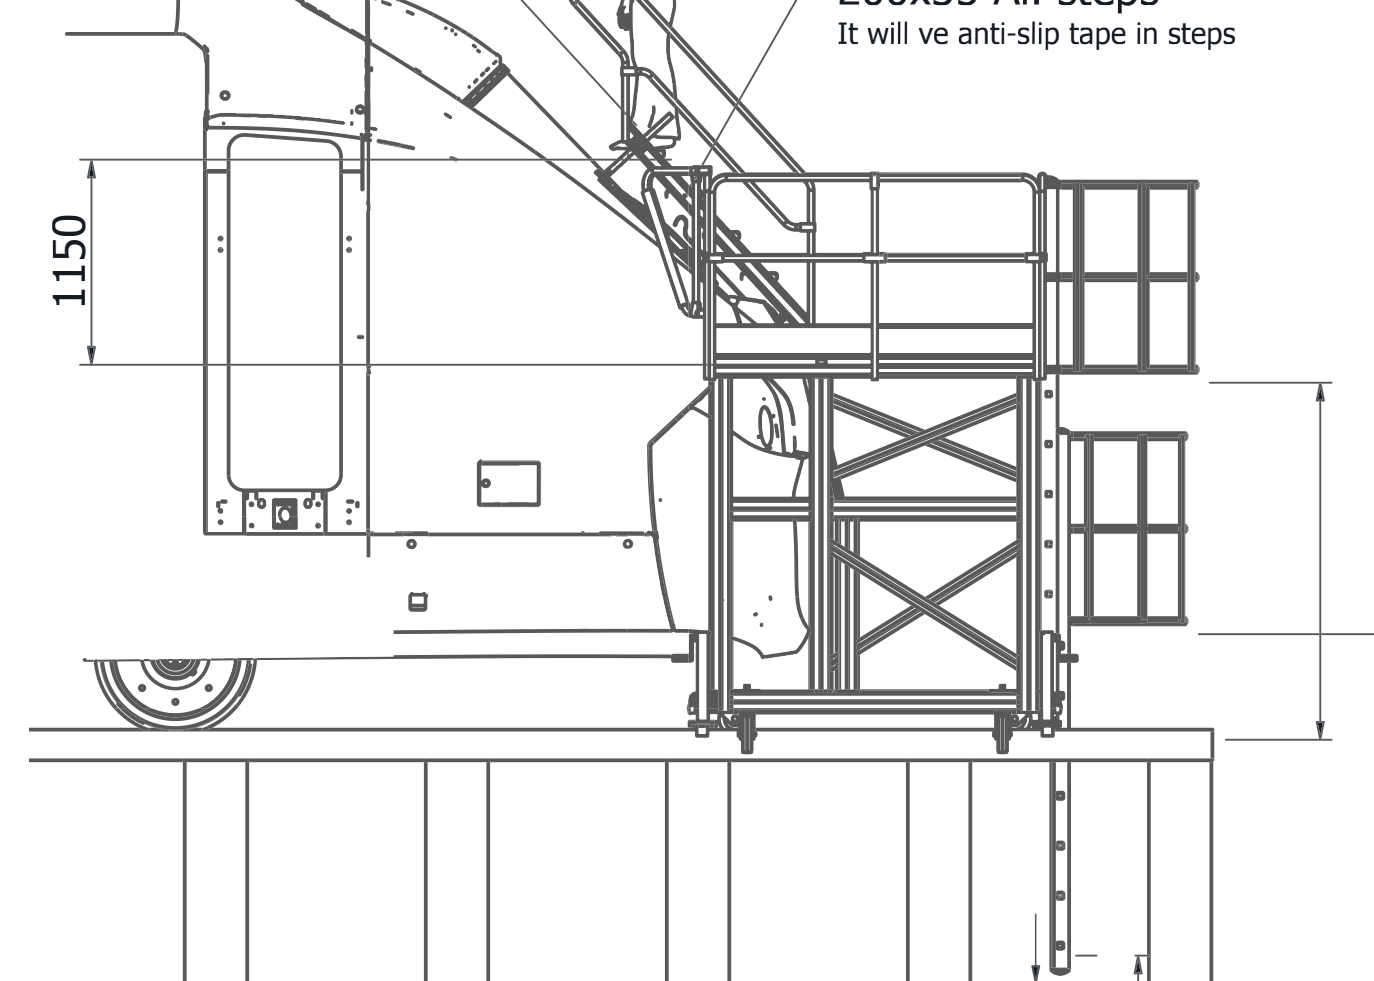

Design

Our project team brings together the collected data and converts it into 2 or 3 dimensional design as soon as possible.

Assembly

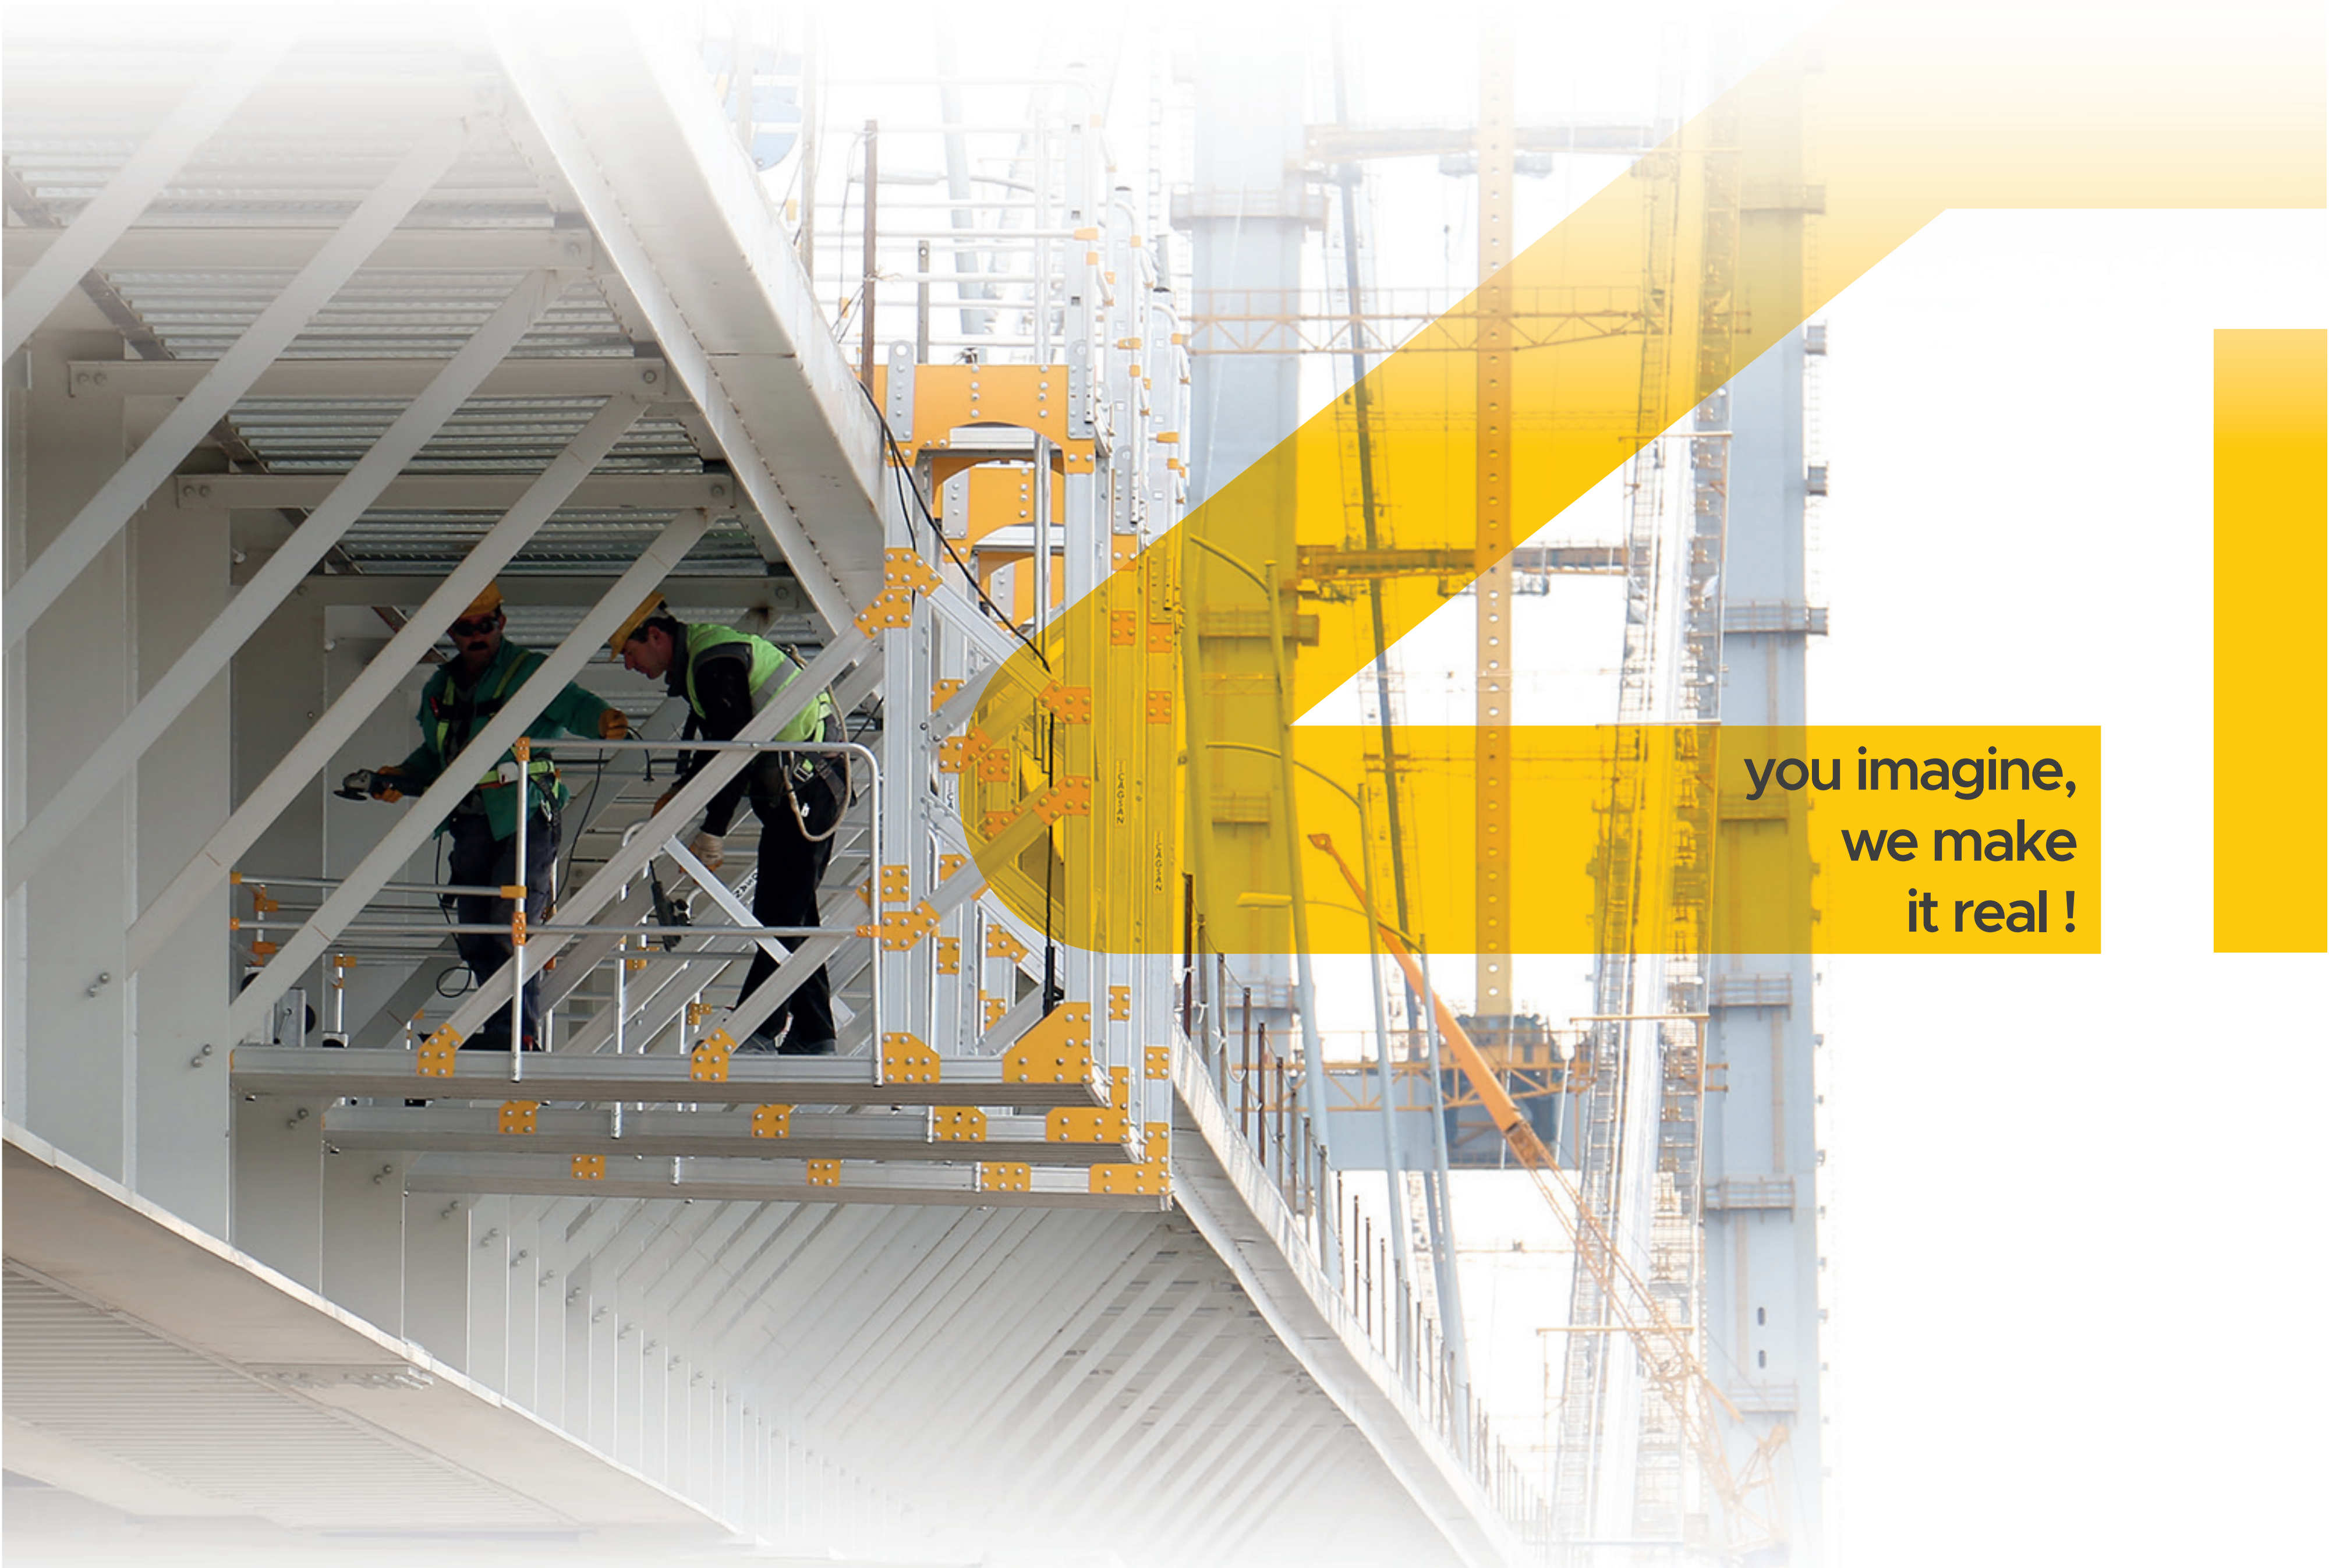

For all products that require assembly, our expert assembly team provides on-site technical support.

Cagsan Technic provides customised products for industrial, aviation, rail systems and outdoor areas.

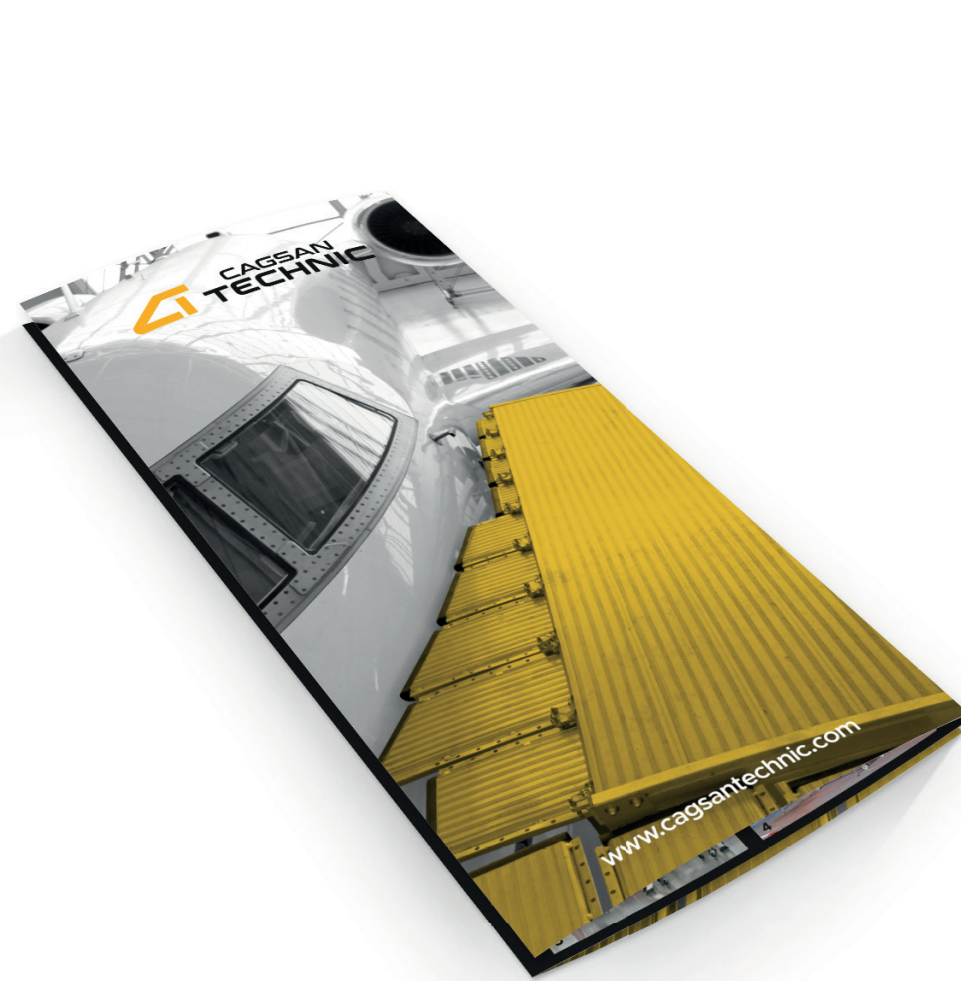

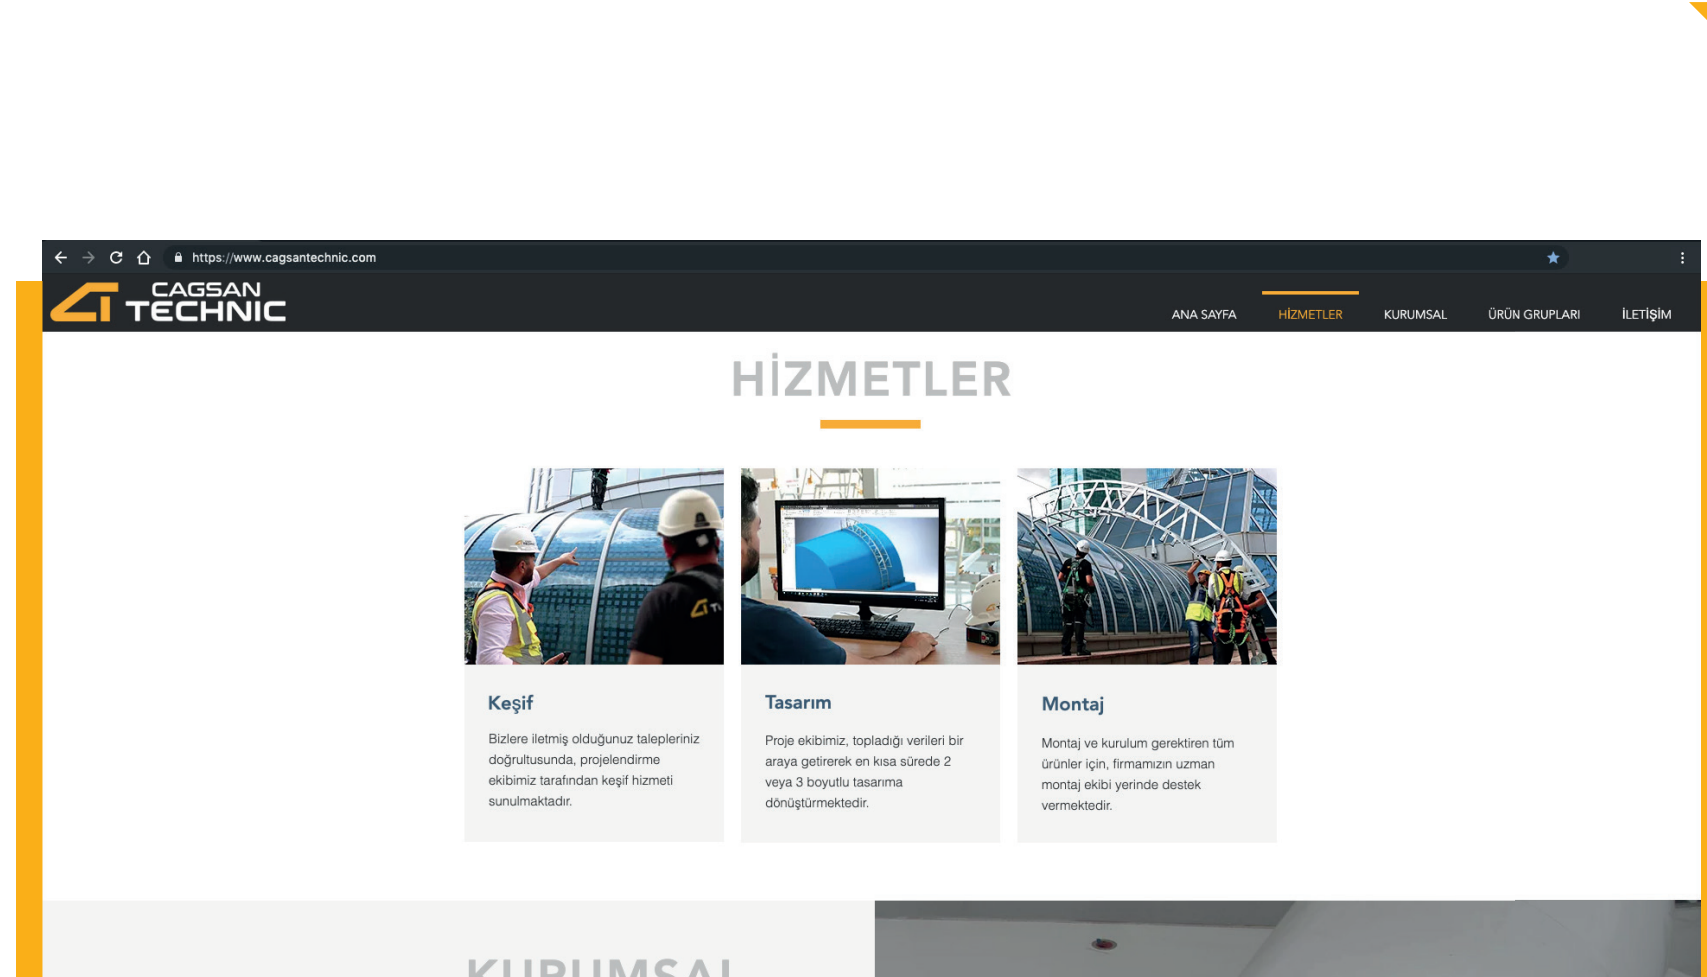

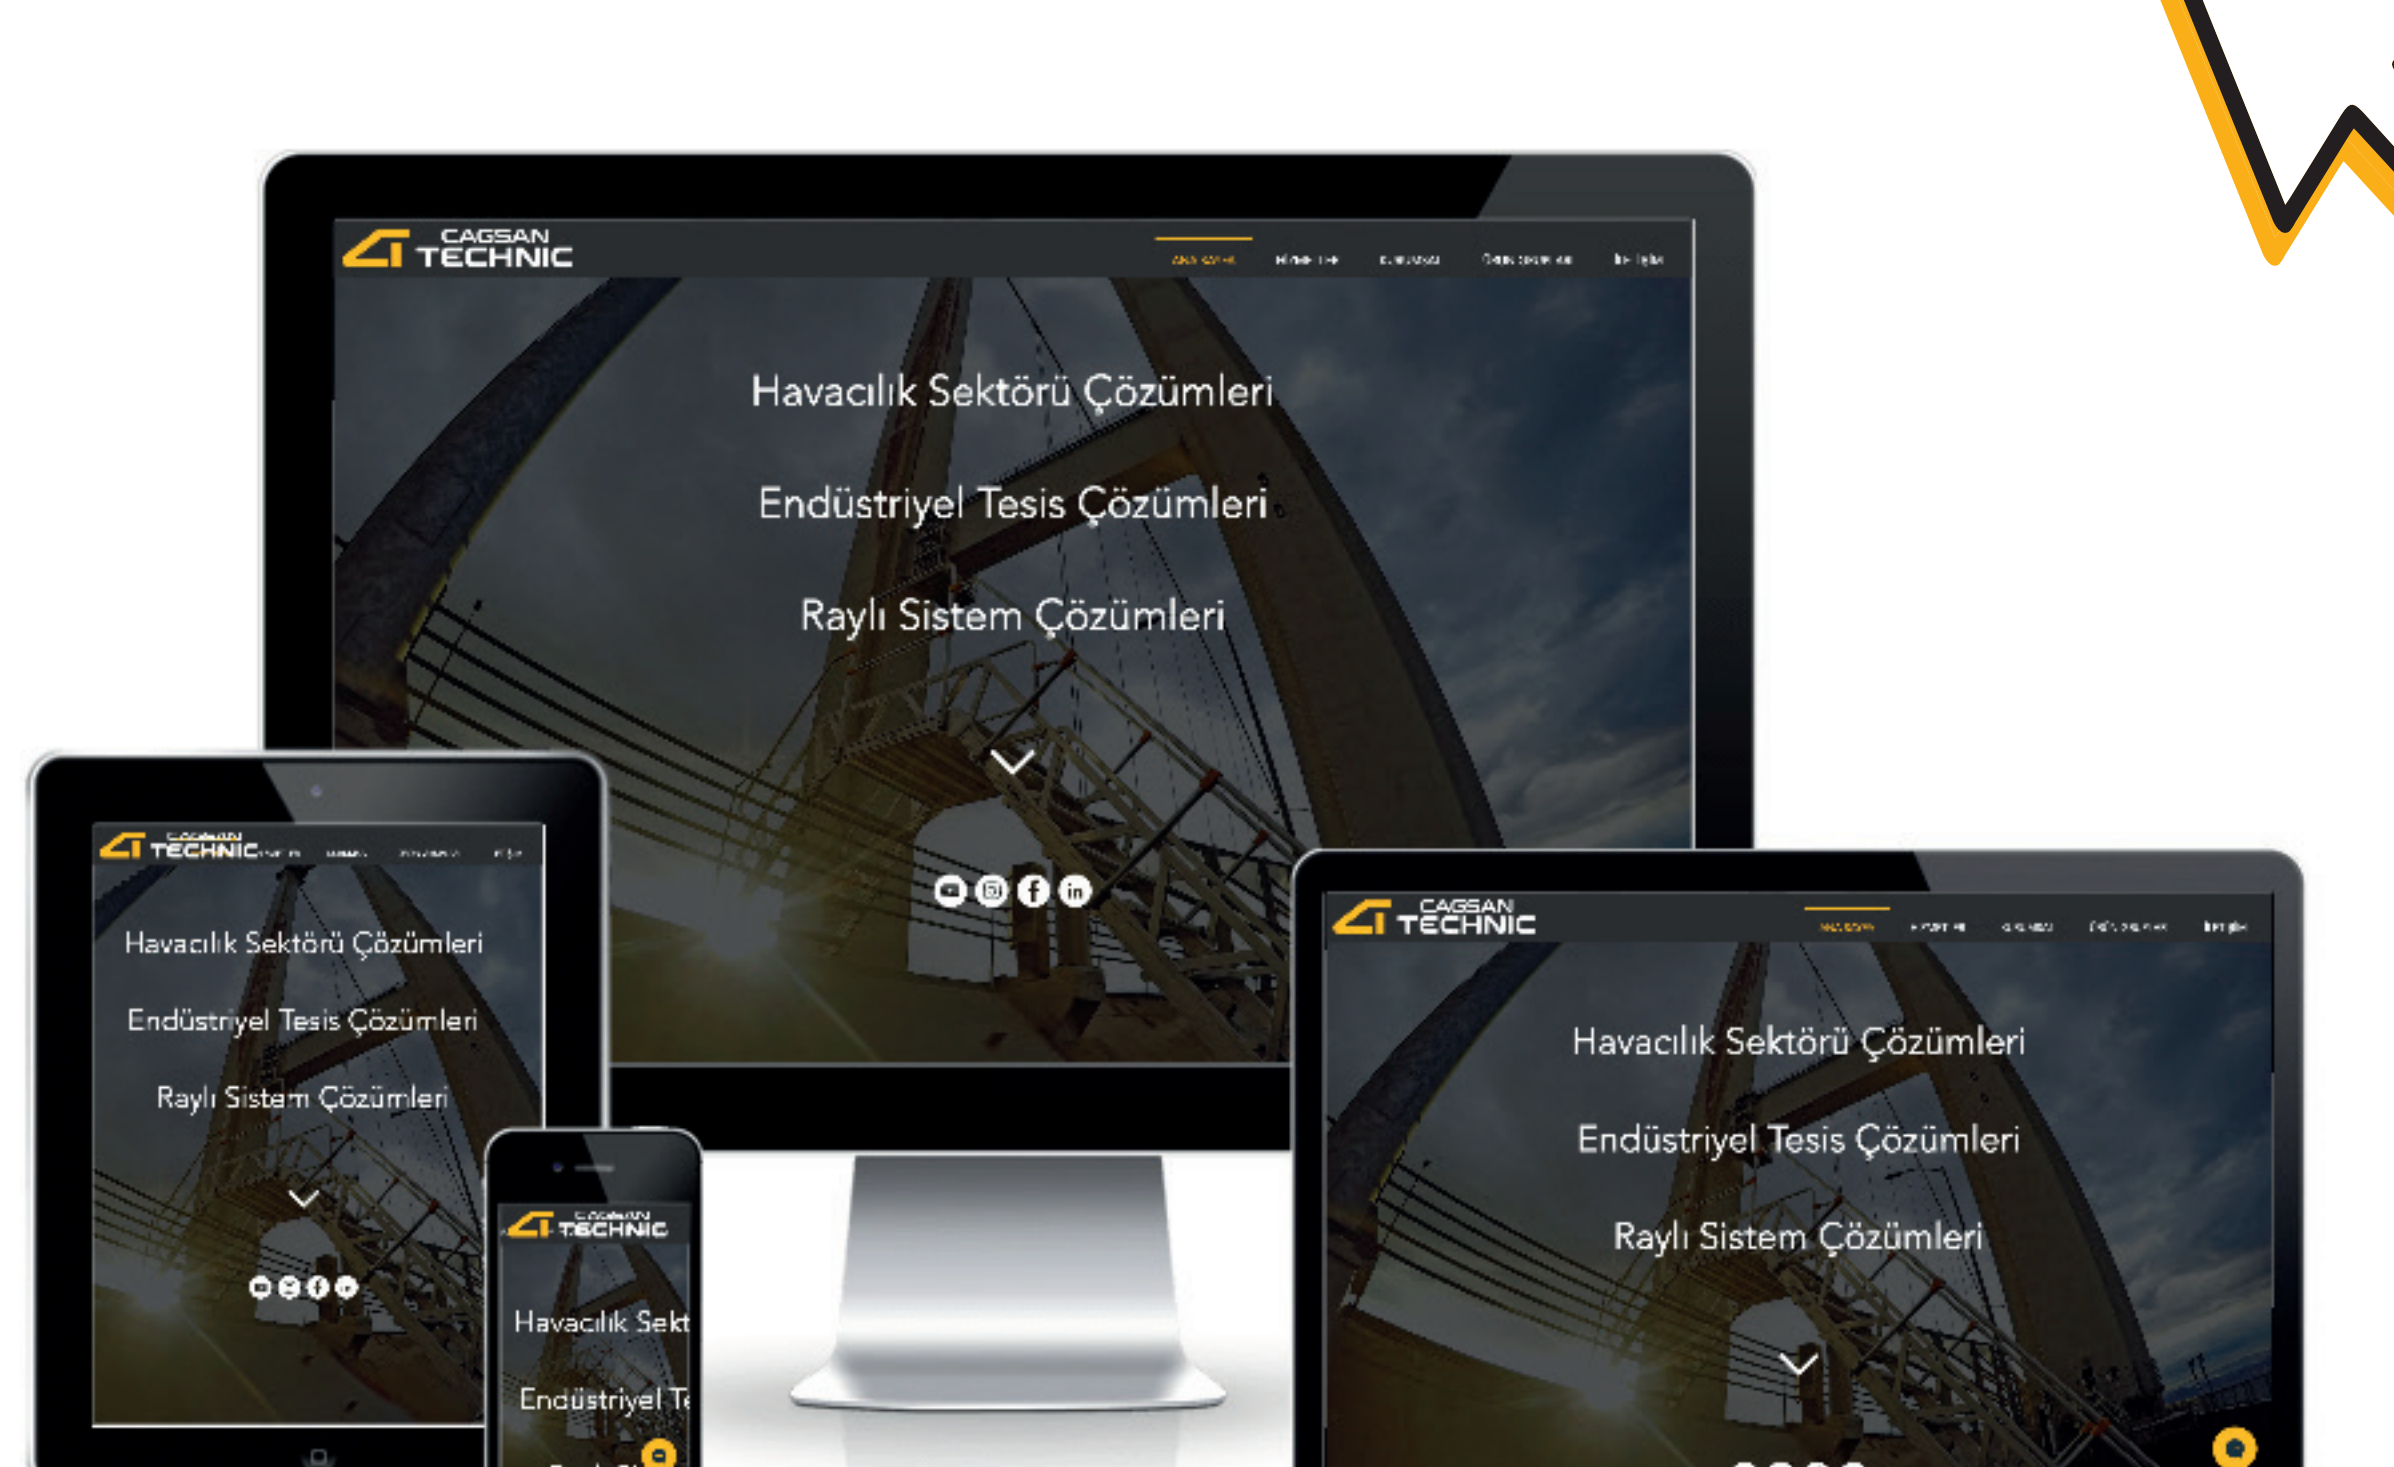

Our products, simplifies the operational process and enable efficient work. Quality is created during the planning & project phase. The development of production systems and technologies are closely monitored and systematically integrated into the company structure.

Cagsan Technic, as a mission, guarantees to maintain its strong position in the Occupational Health and Safety sector and to support the use of quality and secure access products.
